## **8. FINANCIAL INSTRUMENTS- FAIR VALUE MEASUREMENT**

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements in accordance with SLFRS 13.

### **Level - 1**

Financial instruments that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis.

## NOTES TO THE FINANCIAL STATEMENTS

### Level - 2

Financial instruments that are measured at fair value on a recurring basis. As market quotes generally are not readily available or accessible for these securities, their fair value measures are determined using relevant information generated by market transactions involving comparable securities.

### Level - 3

Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.
